CLAIM LISTING

- 1. (original) A system for distributing information comprising:
- a first client computer having first software with a print functionality;
- a second client computer;
- a network connecting said first and second client computers; and means for effecting communication of a document from said first client to said second client as email via said print functionality thereof.
- 2. (original) The invention of Claim 1 wherein said first software is application software.
- 3. (original) The invention of Claim 1 further including a server connected to said network.
- 4. (original) The invention of Claim 3 wherein said means for effecting communication includes means for communicating said document through said server.
- 5. (original) The invention of Claim 4 wherein said means effecting communication includes a first agent running on said client.
- 6. (original) The invention of Claim 5 wherein means for communicating includes a second agent running on said server.
- 7. (original) The invention of Claim 1 further including email software running on said second client for receiving said document.
- 8. (original) The invention of Claim 7 wherein said email software includes means for receiving a message associated with said document from said first client.
 - 9. (original) A system for distributing information comprising:
- a plurality of client computers, at least one client computer having application software with a print functionality:

09/814,302 Docket No. 10001050-1 Response to Office Action Page 2 a server;

a network connecting said client computers and said server; and means for effecting communication of a document from said first client to said second client through said server as email via said print functionality of said application software, said means effecting communication including a first agent running on said client and a second agent running on said server.

- 10. (original) The invention of Claim 9 further including email software running on said second client for receiving said document.
- 11. (original) The invention of Claim 10 wherein said email software includes means for receiving a message associated with said document from said first client.
- 12. (original) A method for distributing information including the steps of: providing a first client computer with first software with a print functionality; providing a second client computer; connecting said first and second client computers with a network; and effecting communication of a document from said first client to said second client as email via said print functionality of said first client.
